

The image features a vibrant, multi-colored marble run structure built from white plastic blocks. The tracks are made of various colored pieces (red, yellow, green, blue, orange) and are arranged in a complex, winding path. Several colorful balls (red, green, yellow, blue) are shown in motion along the tracks. The background is a light green wall. In the top left corner, there is a green circular graphic containing the Hubelino logo. In the bottom right corner, there is a blue circular graphic containing the text 'Catalog 2025'.

HELLO

Thank you for taking a look at our catalog! We would like to take this opportunity to introduce ourselves to you.

We are a German family business based in the most western region of Germany - where all of our products are manufactured to the highest quality standards. From the development of a component and the design of the injection molding tools to the production and packaging of the individual sets, everything takes place right here in the region of Heinsberg.

In addition to the high quality standards, our different products have another thing in common, which is their compatibility with a well-known building block manufacturer from Denmark. This allows us to build on an existing and established system that is familiar to many children and offer additional learning and play opportunities with our products.

Have fun browsing and discovering!

YOUR HUBELINO® TEAM

Big Building Box
#420572  12

Marble Run

Our modular and compatible marble runs are designed to stay put, so your kids can focus on the fun. They promote spatial intelligence and an understanding of fundamental physical concepts like acceleration and gravity. Whether with an instruction booklet or with free play, constructing a marble run stimulates working memory, and improves the capacity for analytical thought. And best of all, we're building on an existing system to extend its life in the children's room.

4 years and up

Stable due to building blocks

Learning to read and write through play

„WHETHER IN REMEDIAL LESSONS OR AT HOME“

With its 250 coloured letter bricks and 8 baseplates, this word construction kit offers a wide range of uses at school, in remedial lessons or at home. It combines play, fun and creativity to playfully introduce first-time readers and children new to writing to the world of letters. Children can put letters together instead of writing them and thus develop a deeper understanding of the form and structure of letters, syllables and words.

How do number pyramids work?

The sum rule applies everywhere.

1

Item	Item-No.	Age	MSRP*1
1. Number Pyramids (Prof. Kortenkamp's Learning Blocks)	410214	6+	119,99 €

*1 Manufacturer's Suggested Retail Price

With Prof. Kortenkamp's learning blocks, elementary school students can build real number pyramids, which they previously only knew on paper in their textbooks. There is a simple principle: The numbers of two blocks next to each other add up to the result on the block above.
